Roni founded EnviroMet in 1995 as a resource for heavy equipment operators that need to clean up spills. The company now offers a full line of affordable spill solutions and drain protection products to a wide variety of businesses.

Welcome to EnviroMet.

If you operate heavy equipment or machinery, I know you occasionally have a messy spill to clean up. EnviroMet has all you need to clean up your oil or chemical spill and protect your facility or drains from pollutants. We've even got what you need to clean up bio-hazard spills.

Take it from me, Mrs. Clean! EnviroMet makes your clean up easier and more affordable. From Spill Kits to Absorbents to Drain Protectors, "We've Got It!"

Clean it up!

Roni Sasaki, Founder and CEO

Storm Drain Defender

Storm water runoff carries with it dirt and hydrocarbons that pollute our downstream supplies. The Storm Drain Defender traps these pollutants, reducing and controlling the entrance of contaminants into our water systems.

The Storm Drain Defender is a simple sheet of geotextile fabric supported by a wire frame. Rectangle or round models both adjust to fit a variety of drain sizes. The entire unit is under the grate, no excess fabric extends above the grate, creating a safer environment for pedestrians. Add a Pillow for oil absorption.

Rectangle Unit

Round Unit

With WPIL10 Pillow

U.S. Patent No. 7,201,843

Storm Drain Defender	Sediment Only	With Oil Pillow
Rectangle Part No.	DD300REC** DDSED-REC	DDREC-WPIL10

Drain Web

The Drain Web is a simple device designed to fit most catch basins. Available with or without an adjustable wire frame. Either style effectively reduces coarse sediments, oil, grease, litter and debris from stormwater.

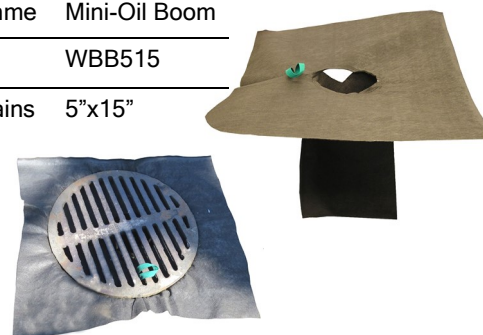

The patented wire frame makes installation and removal a breeze. The wireless unit is held in place by the grate. Add a Mini-Boom for oil absorption.

Curb Inlet Storm Drain Defender

The new Storm Drain Defender for Curb Inlet Drains is a temporary solution for basins with a manhole cover and no grate.

The insert hangs from a wire frame that is held in place in the opening by a simple support bar.

Trap leaves, debris, sediment and pollutants that are carried by storm water into the drainage system, reducing the amount of pollutants that enter the waterway.

U.S. Patent No. 8,475,655

Curb Inlet Storm Drain Defender

Part No. DDCI

Adjusts from 22" - 26" Wide
Depth is approx 24"

Economy Spill Pak

When you need an affordable spill kit that you can stash anywhere, this Economy Spill Pak is the perfect choice to handle small spills.

Refillable water resistant yellow plastic bag with top zipper is highly visible.

Contents

10 Pads Heavy Wt.
3 Socks 3"x48"
1 Temp Disposal Bag
1 Plastic Zip Tie
1 Pr Nitrile gloves
1 Instruction Sheet

Part #SP2O	Oil Only
Part #SP2U	Universal
Weight	5 Lbs
Measurements	18"Hx16"Wx6"D
Absorbs Up To	6 Gal

Deluxe Spill Pak

Sometimes you need a larger spill kit that is still small enough to stuff into a storage bin, or hang on the wall.

This deluxe Spill Pak is packaged in a durable refillable water resistant yellow vinyl coated polyester bag with top zipper and black nylon handle.

The deluxe Spill Pak is highly visible, convenient and equipped to handle many small nuisance spills.

Part #SP1O	Oil Only
Part #SP1OR	Oil Only Refill
Part #SP1U	Universal
Part #SP1UR	Universal Refill
Weight	7 Lbs
Measurements	20"Hx19"Wx6"D
Absorbs Up To	8 Gal

Contents

15 Pads Heavy Wt.
3 Socks 3"x48"
1 Pillow 18"x18"
1 Temp Disposal Bag
1 Plastic Zip Tie
1 Pr Nitrile gloves
Instruction Sheet

SP1U

Plug Kit

This plug kit is an essential addition to any Spill Kit. Stop the leak at its source.

Reduce your clean up costs when you plug a damaged tank, drum or broken hose before the liquid has a chance to spread.

Complete Plug Kit includes assorted sizes of Wood Plugs (4) and Plug N'Dike Patty.

Part #KT-PLUG	Complete Plug Kit
Part #P2	Plug N'Dike 10 Ounce
Part #KWP	Set of 4 Wood Plugs

Wedge—1.5"x1.5"x4"
Cone—1.5" Diam x 4"
Cone—1" Diam x 3"
Cone—.5" Diam x 2"

WHITE OIL ONLY: Absorbs gasoline, diesel, ethanol, engine oil, hydraulic oil, grease, petroleum based solvents
GRAY UNIVERSAL: Absorbs water, petroleum products, chemicals, cleaners, body fluids, anti-freeze, etc.

Wheeled Overpack Drum Spill Kit

When you want to easily roll a spill kit to the exact location of the spill, then use a 50 or 95 Gallon Wheeled Overpack Drum Spill Kit. No need for a separate dolly. Both sizes have built-in handles for a firm grip and 6" polyolefin wheels that give you easy maneuverability through doorways and around obstacles.

You get high visibility with the bright yellow color. When time is essential, the water-tight lid is an easy-off/on screw top design.

Customize your Spill Kit or fill it with the contents from EnviroMet's 55 or 95 Gallon Spill Kits.

Meets regulations: 50 gal - UN 1H2/X125/S, 95 gal - UN 1H2/X113/S, 49 CFR 173.3, 29 CFR 1910.120, 40 CFR 112.7 40 CFR 122.26, EPA, SPCC and NPDES.

Antifreeze Plus Pads

Because all sorbents are NOT created equal!

When you want to clean up antifreeze, or other chemical spills safely and quickly, you can trust our new green antifreeze pad to outperform the rest.

The Antifreeze Plus Pad absorbs GLYCOL better than other Universal Absorbent Pads.

Green Antifreeze Pads-Heavy	
Product #	US-BGNH
Unit/Pkg	100/Bale
Dimensions	15"x18"
Absorbs Up To	21 Gal

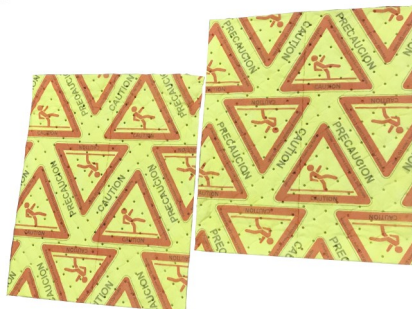

HazMat Yellow Caution Pads

Prevent slips and falls with high visibility caution pads. Bright color and traditional caution symbol warn employees or customers of a potentially slippery floor.

Use as both a warning device and an effective absorbent to soak up leaks, drips and spills.

Absorbs most liquids including acids, bases, oils, and unknown solvents.

Pads are virtually lint-free and durable. They are printed on one side and perforated so you only what you need.

HazMat Yellow Caution Pads	
Product #	US-LYC156
Unit/Pkg	100/Bale
Dimensions	15"x18"
Absorbs Up To	32 Gal

Stay-In-Place Floor Safety Rolls

Ideal for high traffic areas, hallways and entrances, or where ever you need a durable, absorbent mat to "Stay-In-Place."

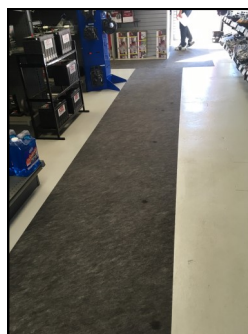

For use where safety and/or cleanliness is a priority!

Adhesive backing sticks to the floor preventing falls by absorbing all liquids. Will not damage floor surfaces.

Durable top hides dirt and is slip-resistant.

Can be used on carpet to keep it clean.

SIP Stay-In-Place Roll	
Product #	SIP100-NP
Unit/Pkg	1Bale
Dimensions	34"x100'
Weight	34 lbs

OptiSorb

The industry standard for spill clean up, OptiSorb is a 100% Diatomaceous Earth premium all-purpose absorbent.

Coarse granules quickly clean up water, oil and grease.

You get optimum value for the money.

Create a clean and safe environment in garages, warehouses, workshops and machine shops.

OptiSorb	25# Bag
Part #	OP8925
Weight per bag	25 Lbs
Absorbs Up To	3 Gal/Bag
Qty/Pallet	80 Bags

Solid-A-Sorb

Solid-A-Sorb (formerly Selectsorb) is a fine granule, 100% Diatomaceous Earth premium all-purpose absorbent.

A bit more coarse than sand, the additional surface space allows it to quickly clean up water, oil and grease and provide gritty traction for slick surfaces.

Create a clean and safe environment in garages, warehouses, workshops and machine shops.

Provides more absorption for the money.

Solid-A-Sorb	25# Bag
Part #	SAS9725
Weight per bag	25 Lbs
Absorbs Up To	3 Gal/Bag
Qty/Pallet	80 Bags

Throw & Go

When you are looking for a natural organic answer to industrial clean-up—Throw & Go, made with American peat—is your answer.

Simple to use—throw it down, let it soak, pick it up. Porous peat moss captures and holds contaminants.

Pumice is added to Throw & Go Super Absorbent to provide traction on slick surfaces.

The pumice also helps hold the peat moss absorbent down in windy conditions.

Contains no chemicals that are harmful to the environment, people or animals.

Targets spills containing oils, diesel, gasoline, solvents, antifreeze, paint, etc.

Throw & Go	.75 Cu Ft Bag
Part #	AM-TGS100
Weight	25 Lbs
Absorbs Up To	5 Gal
Qty/Pallet	60 Bags

OverPack & Salvage Drums

Twist-down lid for safe closure. Closed cell gasket in lid help seal closure.
 Patented castellations in lid allow for easy open and close.
 Molded area allows for easy gripping and pick-up by material handling equipment.
 Patented ribbed design provides extra strength.
 100% UV-protected polyethylene provides protection over a wide range of chemicals.

Weight	98 Lbs	
Sump Capacity	275 Gal	

IBC 2000i™

ENPAC's® integrated IBC 2000i™ fits more than 99% of all IBC dispensing units and makes spill containment versatile for intermediate bulk containers. A large sump capacity of 385 gallons, exceeds EPA 40 CFR 264-175 regulations.
 Dispensing is quick and easy with the integrated 5-gallon pail holder.
 For convenient shipment and storage, the one-piece and lightweight unit is forkliftable (when empty) and nestable.
 The 100% polyethylene unit will not rust or corrode or have adverse reactions with chemicals.
 For outside use and easy cleaning, an optional drain is available.

Drip Sentinel™ Maintenance Blanket™

Use this when you need something under vehicles or leaking equipment to protect the ground from contamination.

Perfect for field maintenance or repair. Roll or Fold for easy storage between uses.

Made of 8 oz, non-woven geo-textile material that is 100 mils thick, backed by 1 layer of 20-mil fuel/chemical resistant polyethylene.

Fabric backing provides an extra barrier to stop hydrocarbons from getting on the ground.

Quick Dam

Quick Dam Flood Bags are sandless sandbags that can be used just as a regular sandbag, but are easy to deploy and clean up after the flood event. Stack bags to increase wall height.

Quick Dam Flood Barriers divert water from doorways, garages & more.

Activates when wet, no sand needed. Grows to 3.5" high in minutes.

Compact & Lightweight. Minimal storage space needed.

Continuous protection for several months.

Not for salt water use.

Part #	Description	Qty/Pack	Pack Size

QD1224-120	Sandless Sandbags 12"x24"	120	20"x24"x13"
QD610-1	Flood Barrier 6"x10'	1	9"x8"x2"

Drain Covers

Block a drain immediately in the event of a spill to reduce the cost of clean up and contamination.

100% Chemically Resistant Polyurethane—these tough but easy to handle Drain Covers are made of solid polyurethane.

Reversible—they are tacky on both sides, so either side can be used to form a tight seal blocking contaminants.

Reusable—wash after use with mild soap and water.

The Neoprene Drain cover is an affordable option for quickly covering a drain to protect against accidental spills and should only be used where completely blocking the drain is not mandatory.

Plug N'Dike

Are you prepared to immediately plug and control a vehicle or truck fuel tank leak?

Reduce the cost of cleaning up a spill by stopping it immediately at its source.

PLUG N'DIKE is a non-toxic material which forms an immediate seal to control flammable and/or hazardous leaks and spills due to a punctured storage or transport container.

Seals off gasoline, diesel, solvents and other chemicals. Not recommended for some biofuels and some chemicals.

Available in Pre-Mix Ready-To-Use and Dry Granular.

Can't find what you're looking for? Call for more products or information.

Below you will find brief summaries of the regulations that most often relate to the products offered by EnviroMet. For full information on specific compliance requirements, please refer to the Code Of Federal Regulations.

29 CFR–OSHA (Occupational Health & Safety Administration)

29 CFR 1910.22 (a)(2)

Floors in your workplace should be “maintained in a clean and, so far as possible, a dry condition.”

29 CFR 1910.107(b)(3)

Combustible floors in a spray booth or work area “shall be covered with noncombustible material to facilitate the safe cleaning and removal of residues.”

29 CFR 1910.107(g)(2)

OSHA requires spraying areas to be “kept as free from the accumulation of deposits of combustible residues as practical.”

29 CFR 1910.120(j)(1)

Commonly known as HAZWOPER, requires DOT containers and proper absorbents to be kept available and used wherever spills, leaks, or ruptures may occur.

29 CFR 1910.1450(e)

OSHA requires containment and cleanup materials for spills in

laboratories to reduce occupational exposure to hazardous chemicals.

29 CFR 1910.1030(d)(4)(ii)

All equipment and environmental and working surfaces shall be cleaned and decontaminated after contact with blood or other potentially infectious materials.

29 CFR 1910.1030(d)(1)

General-Universal precautions shall be observed to prevent contact with blood or other potentially infectious materials. Under circumstances in which differentiation between body fluid types is difficult or impossible, all body fluids shall be considered potentially infectious materials.

29 CFR 1910.132(a)

Personal protective equipment must be provided, used and maintained whenever it is necessary to prevent hazards from coming in contact with any part of the body through absorption, inhalation or physical contact.

40 CFR–EPA (Environmental Protection Agency)

40 CFR 112.7(c)(1)

Spill Prevention, Control and Countermeasure (SPCC)

Facilities must have “appropriate containment and/or diversionary structures to prevent discharge oil from reaching a navigable water course.”

The purpose of the SPCC regulation is prevention of oil discharge into navigable waters and related areas, rather than cleanup after a spill has occurred. The regulation generally affects all facilities with at least 1320 gallons above ground storage capacity, or 42,000+ gallons underground storage capacity. The SPCC requires affected facilities to prepare and file an action plan (the SPCC Plan)

40 CFR 264.175 Containment

A hazardous waste container must not sit in its own spill, and it must be able to hold 10% of total volume of liquid or 100% of largest container, whichever is greater.

40 CFR 122.26

Storm water Regulations,

National Pollutant Discharge Elimination System (NPDES)

The NPDES permit program control water pollution by regulating point sources and non-point sources that discharge pollutants into United States waters. These regulations are a key component of EPA’s Clean Water Act. The goal is to protect the quality of waterways by reducing the discharge of sediment, oil and chemicals into storm drains, surface and ground waters.

40 CFR 263.30(a)

Requires immediate action, such as diking the discharge area, by transporter if hazardous waste is accidentally discharged during transportation.

49 CFR–DOT (Department of Transportation)

49 CFR 173.3(c)(1)

Summary: Packages of hazardous materials that are damaged, defective, or found leaking and hazardous materials that have spilled or leaked may be placed in a compatible salvage drum that meets UN criteria for shipping by air, highway, rail or water. Packaging must be marked “SALVAGE” or “SALVAGE DRUM.”

49 CFR 173.12(b)(2)(iv)

Summary: When labpacking, “Inner packagings...must be surrounded by a chemically compatible absorbent material in sufficient quantity to absorb the total liquid contents.” Each drum shall be provided when necessary with sufficient cushioning and absorption material to prevent excessive movement of the damaged package and to eliminate the presence of any free liquid at the time the salvage drum is closed.

UFC 79.406 (Universal Fire Code)

Summary: When used as a substitute for spill and damage control and secondary containment, pallets shall comply with: liquid-tight sump; sump capacity of at least 66 gallons; compatible substance; provide sump protection from rain water.

33 CFR–USCG (United States Coast Guard)

33 CFR 154.1047(c)(2)

Summary: Concerning navigation and navigable water, a facility which handles, stores or transports Group V petroleum oils must identify response plan resources such as containment booms or other methods.
