Drain Covers

Drain Covers allow you to block a drain immediately in the event of a spill to reduce the cost of clean up and contamination. The red Drain Covers are made of 100% Chemically Resistant Polyurethane, which makes them tough but easy to handle. Reversible—they are tacky on both sides, so either side can be used to form a tight seal blocking contaminants. Reusable—wash after use with mild soap and water. The Neoprene Drain Cover is an affordable option for quickly covering a drain to protect against accidental spills and should only be used where completely blocking the drain is not mandatory.
